Introduction

TEA Publishers is one of the oldest publishing houses in Estonia. TEA started its business producing high quality language learning materials and dictionaries, and has remained faithful to its core business to this day. The portfolio expanded by launching children's fiction and non-fiction titles. 10 years ago was launched the national online encyclopedia, which will be completed by 2018. This encyclopedia has been an important source for different kind of lexicons, smaller and bigger encyclopedias and various reference books.

This catalogue provides the opportunity to see the wide range of languages covered by our dictionaries, and also showcases the ever expanding range of formats in which they are produced; from the handy pocket versions for travellers and the series of school dictionaries to the specialised, medium-sized and large dictionaries, most of which are accompanied by CD-ROMs.

This catalogue also presents TEA's most advanced language learning materials where traditional textbook materials and exercises are skilfully combined with audio-lessons, vocabulary training and multimedia clips, all supported by clear and concise teacher's guides and self-study tips. We are proud to present our Estonian language textbook for beginners "Saame tuttavaks!" in 4 languages (English, German, Russian and Finnish), which is an absolute must for those who would like to give this language a good start. The book is accompanied by audio-CDs and a large range of cross-cultural texts and tests.

Last but not least, TEA's portfolio includes reference books, which are carefully selected from the catalogues of our chosen partners in Europe and beyond, and then professionally and carefully translated. This catalogue gives a short overview of some of the most successful titles, and highlights the growing influence of TEA's own original reference materials.

An important development was the purchase of ILO Publishers in order to join the forces and extend our market share of the pre-school educational materials and of the school textbooks. ILO has also been a well-known reference and phrase-book publisher together with language learning and pre-school materials for 20 years.

You are welcome to search for and buy rights to our most advanced and top-selling titles from this catalogue of TEA encyclopedias, dictionaries, reference publications, language learning materials and children's books.

TEA Dictionaries

Long experience in publishing dictionaries has forged for TEA's reputation as a publisher that can be trusted by both a casual user and a top professional. The range stretches from handy pocket-size dictionaries to comprehensive bilingual and monolingual dictionaries in a wide selection of languages. TEA has also published semi-bilingual dictionaries, which prove to be irreplaceable for those who would like to move on to a monolingual dictionary.

Our most successful bestseller is the series of bilingual pocket dictionaries in 9 different languages: English, Russian, German, Spanish, Italian, Portuguese, French, Finnish and Swedish. This series is published both in a bigger pocket format and a mini-format. As a further development, a series of travel dictionaries was created on the basis of these pocket dictionaries. A recent addition to this series was the launch of our Dictionary of Foreign Words in a mini-format.

A successful line of bilingual school dictionaries has now 10 dictionaries altogether. These books have been designed for school use and are all accompanied by CD-ROM. Editors have paid more attention to the instructive side of this series in order to get schoolchildren used to dictionaries in general and offer them guidance throughout the active process of dictionary use.

A new series of dictionaries were introduced in the beginning of 2010 – Basic Estonian Dictionary for Beginners. The first book in this series was for English speaking learners, followed by dictionaries for Russian and Finnish speaking learners. The series is mostly meant for those who have started to learn Estonian as a foreign language and need their first dictionary.

TEA is a licence holder of the most respected English-Estonian dictionary of all time by our prominent linguist Johannes Silvet. The first edition of this flagship dictionary dates back to 1939 and has now been revised and updated by TEA. This great piece of work is also available on CD-ROM.

TEA has made several dictionaries in cooperation with many well-known dictionary publishers around the world. We have had long and productive cooperation with Chambers Harrap, Larousse, HarperCollins, Gummerus, KDictionaries to name the few.

TEA Language Learning

High quality language learning has always been one of the major strengths of the TEA trademark in Estonia, especially because TEA has its roots in publishing language learning materials for the TEA Language Centre.

Today, after more than 20 years of growth, TEA has an extensive portfolio of textbooks and course materials at all levels, covering all the major foreign languages taught and learnt in Estonia.

This catalogue presents a brand new family of original textbooks accompanied by audio-CDs and CD-ROMs for learning Estonian, Finnish, Russian and English. The highlight among our own original work is the Estonian language course book for beginners called "Saame tuttavaks!" (Let's get acquainted!) in English, Finnish, German and Russian languages. This is an absolute must for those who would like to give this language a good start. The book is accompanied by audio-CDs, and soon a fully interactive e-book will be launched.

Another step forward was to create a complete course of business English at an upper-intermediate level. The most competent team of authors has successfully combined the best teaching practice with their knowledge of the needs of the business environment in Estonia and in other member states of the European Union.

An important part of TEA's portfolio is the full series of school books for learning Russian. Recently we launched the whole series of English language school books called "Wow!", "Key English" and "In Touch".

Estonian

Saame tuttavaks! Estonian for Beginners

Textbook + 4 Audio-CDs

Silva Tomingas

Quick, simple AND easy!

"Saame tuttavaks!" is an Estonian textbook for beginners who have just started learning Estonian and are also interested in Estonia and Estonians. The textbook invites learners to become acquainted with Estonia and the Estonian language as the title suggests – Let's get acquainted!

"Saame tuttavaks!" suits self-study perfectly because the learner is given clear explanations and instructions in English, comprehensive grammar presentations, numerous exercises and tests with answer keys, and listening material.

The Estonian language lessons are complemented with background information about Estonian history and society. Furthermore, the textbook also informs the learner about cross-cultural differences, so the textbook becomes a practical guide with many useful tips for understanding the nature of Estonians. Each unit begins with a text introducing a certain aspect of Estonia illustrated with a fine selection of photographs and ends with a comment on cross-cultural differences, and so the textbook is interesting to read or leaf through even without the intention of learning Estonian.

The textbook includes:

- 15 units to be covered in about 120 hours
- clearly presented grammar supported with a wide variety of exercises
- grammar and vocabulary tests as well as tests on Estonia, its history, society and people after every three units
- plentiful illustrations
- a Grammar Guide so the learners can study at the depth they want
- the Vocabulary of the Units and alphabetical Estonian-English and English-Estonian glossaries
- 4 audio-CDs with pronunciation, grammar, texts, dialogues, exercises, tests, expressions and vocabulary, etc

1 External Factors

The further fate of production and goods depends very much on the pricing of the goods. Pricing is a very difficult procedure in real-life situations. You have to consider very many aspects of your own act and also you have to interview business partners.

According to the circumstances, you may have to price the same thing very differently depending on the place of production, customers, materials and finally different cultures and usage traditions.

The aspects you have to consider are:

The product itself and its cost. It means how much money was spent; how much labour and material you have used.

The customer need for your product. If the need is developed, you can set a higher price. If not, you have to be more modest, but you should not fix a price lower than the costs were. It is dangerous for the firm, it could be done only for a very short time as an **introductory price** to lure customers.

The demand. You have to be skilful and have a good **instinct** to find demand or create one. A good businessman knows how to create demand.

The market. A lot depends on the market and the **niche** that you manage to find. Presently it is very difficult to find the right markets. Markets are full and your product must be something special to find an **adequate market**.

The competitors. You can never forget them, you always have to **monitor** them. They may strongly influence your price, usually by forcing you to lower it.

Geographical reasons. The same thing may be cheap in one place and very expensive in another place, depending on the raw material and transport costs. The farther the product is sold from the place where it is produced the higher the price.

Cultural reasons. In some countries they don't eat pork, so it is unwise to offer even the choicest ham there. The same applies to alcohol, as there are countries where religion does not allow drinks with even the smallest percentage of alcohol. Or try to offer for coats in equatorial countries.

Answer the questions below:

1. What do the prices in your country depend on?
2. What do the prices depend on in our local market?
3. What do our food prices depend on?
4. How are the prices of consumer goods influenced?
5. How much do seasons influence our food prices?
6. Why do we have big sales so often?
7. When do big sales usually take place?
8. Why do prices on some goods go up so fast?
9. Are there any goods that do not sell in our country?

2 Factors Under Your Control

The above-mentioned were factors that may influence your price from the outside, but there are factors that you yourself can determine.

When introducing a product on the market, introductory prices are used to attract the customers' attention and speed up the sale.

Basic list price is the price that you can set for the customer to buy your product, if may fluctuate slightly depending on the market and some other factors.

You may use discounts on various occasions. They are reductions from the basic price just to encourage repeat buying, which means that the customer would come again and buy from you, rather than go to the competitor.

The reduction of price may encourage the customer to buy in greater numbers or within a certain time limit. Very often you can see advertisements "50% reduction till the end of the month or while stock lasts".

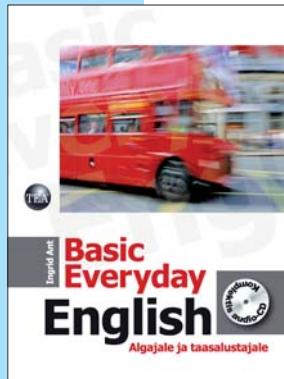

Answer the questions below:

1. What influences the prices in our country?
2. Do you usually rush to buy something at big sales?
3. How do people usually react to big sales?
4. Why cannot a company reduce the price of an item below its cost?
5. Do you think it is good when prices fluctuate too much? Why?

These inspiring and entertaining Russian language school course books are the absolute favourites of Estonian teachers and pupils at all school levels. They give learners the pleasure of communicating in this difficult language step by step, and give teachers a great opportunity to vary their lessons according to their style. Students appreciate the modern communicative methods utilising songs and witty dialogues or exercises. Though specially designed for the Estonian learner, they are excellent books for teachers in any other country who will find it easy to customise some of the specific grammar sections to derive the full benefit from the series.

ESTONIA

The Republic of Estonia, a country comprised of islands and a mainland region, is located in Europe along the coast of the Baltic Sea. The only countries positioned further north are Iceland, Finland and Norway (as measured from the southernmost point of the country's mainland). Estonia's widest reach from west to east is 350 km from north to south, it measures 240 km. The coastline of mainland Estonia is 1,317 km along the Baltic Sea, and with the shores of the country's many islands, the coastline of Estonia totals 4,016 km. The state border is 1,450.6 km (681.6 km on land and 769 km in territorial waters).

Estonia became a sovereign state on 24 February 1918, with independence resulting from the War of Independence (1918–20) and peace through the Treaty of Tartu signed with Soviet Russia. In 1939, the Soviet Union forced Estonia to sign a "mutual assistance" pact, which served as the pretext for building Soviet military bases on Estonian territory and occupying the Republic of Estonia. From 1941 to 1944, the Germans occupied Estonia, and from 1944 to 1991, Estonia was again under Soviet occupation.

EESTI ISESEISVUSE TAASTAMINE

Ehkki NSV Liidu põhisüdas luhas liiduvabariikidel formuliselt kriitigist läbksa, ei olnud selle NLKP ametiruumis oluline tegelikult võimalik. Veelgi mõeldamatam olnuks 1918. aastal rajatud Eesti Vabariigi iseseisvuse taastamine. Olukord hakkas muutuma 1980. aastate II poolel, kui NSV Liidu sisemise nõrgenemise ja reformatsiooni töödega ka läineteilike survele hakkaks kujunema võimalus omavahelise taastamiseks. Kasva aitas ka 1987. aastal Eestis alam aktiivne kodanikulikkumine. Riigimistel asutatud suurimaad murrangulised siimnused, mis võimaldsid 20. VIII 1991 taastada Eesti iseseisvuse ning järgmisel aastal ka põhiseaduslikku korra.

Perestroika algusest Balti ketini

1985. aastal NSV Liidu juhiks saanud Mihail Gorbatovi algatas NSV Liidu reformatsiooni (perestroika ehk intimitse ja glasnost ehk avalikustamine) katset ja need võimakas hakanud ühiskonna ja keskkonna muureldustehed räikima, kuna muu hulga leevendati isemicid ranged tõeusuurnorme. Eestis oli esimese avalik protestatseioni nn fosforiässide – 1987. aastal alamad kampannia, mis vaimustas NSV Liidu koloonias kava rajada Lääne-Virumaaale suureid fosforiässide kasutusid. Protesti järjekord ja puhamende osalust said mitu NSV Liidu keskviimast kuu ja Eesti NSV juhikond. Fosforiässide aitas oluliselt kaasa ühiskonna poliitiseerumisele ning selle edukas: 1988. aasta lõpul otsustas Eesti NSV Ülemnõukogu kreedit Kirde-Eesti fosforiässide kaevandamisele.

Esimesine otsene Nõukogude režiimi vastustav poliitiline aktsioon oli 25. VIII 1987 Tallinnas Hirvepargi toimumud märelaavalus, mille korraldas hiljem loodud Molotovi-Ribbentropi Pakti Avalikustamise Eesti Grupp (MRP-ATG) ning kus mitu Molotovi-Ribbentropi platja salaprotokoli avalikustamist. 1986–87. aastal levis kogu Eesti muinuskaitslukumine ning 1987. aasta detsembris

asutati Eesti NSV esimese demokraatlikku loodud kodanikuteühingu – Eesti Muinuskaitse Selts. 1987. aastal siis�est esitasid Siim Kallas, Tiiu Made, Edgar Savisaar ja Mikk Titma ettepaneku, et Eesti NSV viiks NSV Liidu koosseisu üle mitmna täielikule sejamajandusele, seda hakati nimetama Isemajandura. Eesti ehitab DME projektiks. Järgmisel aastal sai Eesti siseste majandusreformide ideedisseks aluseks, 1989. aastal kinnitati Isemajandusele ülemineku otuseks hakan ka Eesti NSV Ülemnõukogu. See võimaldas juhi enne iseseisvuse taastamist astuda hulgatolliselt samme turumajanduslike üleminekuseks.

1988. aastal toimus mitu Eesti jaoks ürmtatak olnud siinmust: 1.–2. aprillil peeti Toompeal Joomingi galvye lättude juhatusse olümpionoom, kes kritiseeriti Eesti NSV juhikonda ning juhili täheldypäeva Eesti rahvuskalenderi halvale olukorralle ja venestamise sõvenemisile. Põremassi esitatud seisukohti tortas lai avalikkus. Aprilli keskel esitas Edgar Savisaar idee kuu peretromika tooturimise rahvalikumine Festivaa Ralivõimine ehit Ralivõimse Perestroika Toetusks (ametlikult astutati see samu aasta oludeks). Samal aastal tekkis mitu rahvalgatuslikku liikumist, sh järgmistel aastatel aktivisid politikas tegutsevad.

Suur perenaise käsiraamat

"There's no place like home" is an old favourite saying heard in every language and country, big or small (or even imaginary - as in the grand finale of the "The Wizard of Oz") .

Home is a very personal concept and it has proved quite a task to create a handbook for the home which covers all aspects of home life and is capable of being relevant to us all. There are so many excellent books on home cooking, cleaning, family finance, health, child care, DIY, pets, gardening, etiquette etc.; the internet provides access to a wealth of information if we care to surf the web. However, it is becoming increasingly rare to find concise, trustworthy guidance with a more holistic approach.

In designing and writing our "COMPLETE HOME HANDBOOK" our ambitious goal was to collect the best articles and tips from the experts and combine them into well balanced chapters where information on the innovative technologies created for the modern home is given alongside some traditional domestic wisdom.

The book begins by discussing how we start to set up our own home, and the most important questions we need to ask ourselves before making those crucial decisions about our home. The chapters also focus on family finance, home design, functionality, equipment, cleaning, wardrobe, family vocations, health care, safety and security, food and many other aspects of domestic life. Carefully chosen and designed illustrations, photos, charts and step by step instructions make this a wonderfully accessible book. An added innovation is the extensive glossary of terms needed to deal with professionals in different fields and the full index is the ideal aid to find any topic in a hurry.

The historical maps of Estonia are presented with the Latvian areas and our nations' intertwined history is examined together, as well as when the history of Estonia is examined, the chronological connections with the history of the Old World are shown.

The book provides comprehensive information on the development of the world culture. To illustrate it, the author has created and worked out schemes about:

Such heroes of Russian folk tales as Tsar Saltan, Tsar Ivan, Vassilissa The Beautiful, Ivan The Fool, the Sister Aljonushka and the Brother Ivanushka lead the reader to a wonderful and magical world. "By the pike's wish" and "...at my command" the odd things are born, here the furnaces are flying around, eagles become beautiful princes and frogs turn into clever tsar's daughters, here the goddess of the copper mountain wearing a silk dress is beautiful to look at but charmingly dangerous. Readers who are yet to get acquainted with Russian folk fairy tales discover an exciting and peculiar magical world where there is always a place for a miracle and spectacular events, where the goodness and the cleverness defeat the evil. The fairy tale creations of such Russian writers as D. Mamin-Sibiryak, P.Bazhov and A.Platonov have become classics of Russian literature. Aleksandr Pushkin have been inspired from Russian folk fairy tales and shaped them into beautiful verses.

To the Bottom of the Sea with Waving Flags!

Lippude lehvides mere põhja!

Vello Mäss

The book "To the Bottom of the Sea with Waving Flags!" is a sharp and well focused view of the research of marine archeology carried out by the Estonian Maritime Museum. For many decades, the museum has done field work on the high seas, searching, finding and exploring the sunken ships within the local sea area. Because our small country is located right at the crossroads of historical and modern sea journeys, many wrecks have been found. Also the merciless flame of many sea battles has burnt here, bringing hundreds and hundreds of different vessels to the seabed with thousands of seamen with them. Going to their first research trip 32 years ago, the future scientists didn't know of any shipwreck locations. What was their location and what happened to them, was still waiting to be clarified. The developments in underwater surveys of Estonian Baltic Sea neighbors Finns, Swedes, Danes and Germans were taken as a model. Today, the Estonian Maritime Museum is one of the few museums in the world, possibly the only one that in such a long period of time, without interruption, from year to year, is working on the high seas. All of this has been and will be done with the help of our best co-partners with the aim of researching the maritime history. Many of the vessels that have been found, of which some stories are also told in this book, have been the national pride of their owner countries. The book has another meaning that educated and professional sailors have kept in mind. Almost all of the sunken ships have taken with them the sailors who fulfilled their duties to the last minute, a memorial worthy of recording, even if anonymously, through the stories of these ships. The seabed has decade's worth of secrets to hide. Each wreck there represents yet another page in the exciting book of maritime history.
